

A Beautiful Legacy

A solution to stubborn fat pockets and cellulite.

Venus Concept has once again revolutionised non-invasive medical aesthetic devices with the innovative Venus Legacy. Specialising in body contouring and skin tightening of the face, this device will not only reduce stubborn pockets of fat and decrease cellulite and stretch marks, it can also tighten skin on the face, neck and body too. The Venus Legacy machine utilises Multi-Polar RF to deliver fast, pain-free and homogeneous heating to multiple tissue depths resulting in excellent outcomes. Employing Pulsed Magnetic Fields technology – an energy that has been used in traditional medicine for decades – it is both scientifically proven and safe. Not only that, with Real-Time Thermal Feedback that integrates a hands-free thermometer with an on-screen visual feedback graph, Venus Legacy allows constant tissue contact to promise better clinical results. Aesthetic Physician Dr. Christina Chea gives the 411 on how Venus Legacy works and why she recommends it to her patients.

Aesthetic Physician,
Dr. Christina Chea.

WHAT IS VENUS LEGACY AND HOW DOES IT WORK?

Venus Legacy is an advanced aesthetic solution for non-surgical body contouring, cellulite reduction, stretch mark improvement and skin tightening for the face and neck. It uses 4D technology that combines radiofrequency, Magnetic Pulsed Therapy, Vari Pulse and Real Time Thermal Feedback. Venus Legacy's many treatments can benefit patients via two new treatment applicators called SculptFX and LiftFX using the aforementioned 4D technology. SculptFX helps to stimulate fat and cellulite reduction, tighten lax skin and improve appearances of stretch marks. The LiftFX assists in generating new collagen and elastin fibres and renewing blood supply to the treated area. In addition, Venus Legacy also aids in lymphatic drainage and improvement of circulation.

HOW DOES VENUS LEGACY BENEFIT YOUR PATIENTS?

Patients have raved about this machine, saying they can now fit into their old swimsuits. This body-contouring device will not only contour and flatten that abdomen to give you a defined stomach; it will reduce volume in the arms too. Not stopping there, it can reduce the circumference of one's thighs and even smoothen cellulite for tighter looking legs. My patients have even said they're wearing more short skirts after Venus Legacy treatments. In regard to facial treatments, Venus Legacy can decrease water retention around the eye bags, reduce volume and tighten skin on the jawline and neck, as well as contour stubborn pockets of fat at the bra-line and lift the buttocks.

HOW COMFORTABLE ARE VENUS LEGACY TREATMENTS AND HOW MANY SESSIONS DOES ONE NEED FOR FAVOURABLE RESULTS?

The treatment feels like a warm, soothing massage. Although it may be pleasant, safe and without any downtime, it's satisfactory, effective and can be done during one's lunch hour. Each treatment takes about 20 to 30 minutes depending on the treated area. One needs at least four or more weekly sessions for the face and at least six for the body. The number of treatments required may vary among patients subject to their facial or bodily profiles. Bear in mind, this is a non-invasive treatment, so a series of treatments will be needed for desired results. Nonetheless, each treatment still provides a noticeable difference.

HOW DOES VENUS LEGACY COMPARE AGAINST OTHER BODY CONTOURING DEVICES AND HOW HAS THIS MACHINE HELPED YOU AS A DOCTOR?

Venus Legacy is different from other body contouring devices because it uses new standards in the medical aesthetics industry to deliver safe, pain-free treatments that produce superior outcomes. It's the first and only FDA-cleared device to utilise the revolutionary 4D technology, combining Multi Polar Radio Frequency, Pulsed Electro Magnetic Fields and VariPulse technology with Real Time Thermal Feedback. This is so much better compared to conventional RF devices. Venus Legacy has helped me by treating multiple conditions in a safe and painless manner. With Venus Legacy, my clinic can promise a better and more beautiful tomorrow to all its patients. The Venus Legacy experience is described as one of the best and most pleasant treatments that promise efficacy with zero downtime. In fact, Venus Legacy is one of my personal favourites too!
